Version With Markings to Show Changes Made

Part y

Paragraph beginning on page 2, line 13, and ending on page 2, line 18:

Stationary jacking mechanisms exist that can lift heavy objects vertically, while stationary conveyers exist that can move a heavy object in a horizontal direction. However, there exists a need for a device, and a method, that can enable the transfer of a heavy object, such as a semiconductor chip test head; on one compact mobile device that integrates mechanisms that can lift and align the object adjacent to a desired location.

Paragraph beginning on page 4, line 1, and ending on page 4, line 4:

FIG. 6 is a side view of a gas cylinder assembly in accordance with RECEIVED embodiment of the present invention;

SEP 04 2007

Paragraph beginning on page 4, line 7, and ending on page 4, line 83600 MAIL ROOM

FIG. 9 is an illustration of a lift and align table in accordance with an embodiment of the present invention in use; and,

Paragraph beginning on page 4, line 9, and ending on page 4, line 10:

FIG. 10 is another illustration of a lift and align table in accordance with an embodiment of the present invention in use.
